### OUR ATTITUDE TOWARD AGENTS

Our splendid success is due, in part, to the fact that we officers  
have been agents ourselves and therefore understand the prob-  
lems of the field men. We co-operate with and help them to  
make money.

MANUFACTURING, BUSINESS, AND CONSUMER TRENDS

CONCLUSION: The results of this study suggest that the use of a single, standardized, and validated questionnaire is a feasible and reliable method for assessing the prevalence of dental caries in a large, representative sample of the general population. The findings also highlight the importance of regular dental check-ups and preventive care to maintain oral health and reduce the burden of dental caries.

## Directory Libraries

Every Polk office has a library of directories of various cities. These are maintained for the convenience of our patrons, and they are constantly supplying information of many different kinds to people who come to use them.

City Directories are City Catalogs. They contain a list of everybody and everything within a city. Many of the more progressive concerns buy directories of various cities as they are issued for mailing list purposes.
